Meta's Proposal[s]

MDL 3047 – 2024-12-20 Agency Discovery JLB
New York – Meta Proposal

Search Terms: Meta has search term disputes with the following New York agencies (i) Council on Children and Families, (ii) Department of Education, (iii) Department of Health, (iv) Office of Children and Family Services, (v) Office of Mental Health, (vi) Office of the Governor, and (vii) State Division of Budget. At a high level, Meta’s proposal involves using search combinations that require “Social Media Terms,” “Harm Terms,” or “Other Case Issue Terms” to occur “within 100” of “Youth Terms”:

(teen* OR tween* OR adolescen* OR kid* OR youth* OR minor* OR young* OR child* OR underage* OR “under-age” OR juvenile* OR “pre-teen*” OR preteen* OR “U18” OR “under 18” OR “U13” OR “under 13” OR “gen* z” OR “gen-z” OR “gen* alpha” OR gen- a* OR student* OR pupil*)

Custodians: Meta proposes that the above search terms be run on each agency’s custodial documents (including email and other custodial data sources), and relevant non-custodial data sources, that cover the entire period from January 1, 2012 to April 1, 2024, which encompasses the same time period from which Plaintiffs seek discovery, and have plead as the “Relevant Time[]” in Plaintiffs’ Complaint. *See* ECF No. 969; MDL Compl. ¶ 19 (alleging a “Relevant Time[]” that starts “no later than 2012”).

Meta proposes that the search terms set forth above should be run against at least the custodians listed below. Custodians designated with an asterisk (*) have been affirmatively proposed and agreed to by New York during the course of the Parties’ negotiations. To the extent that the custodians below do not cover the relevant time period or all relevant topics for each agency, the State and/or agency should propose additional custodians to Meta, and Meta reserves the right to select additional custodians.

The New York Attorney General’s Office has not proposed custodians for the New York Governor’s office or State Division of Budget. Nor has it produced information that is sufficient to allow Meta to identify a representative set of custodians that covers the relevant time period and subject matter for each agency. Accordingly, to the extent those agencies are directed again to participate in the agency discovery process, Meta requests that the Court require those New York agencies to identify custodians that meet that criteria within three days of the Court’s order resolving this dispute. Meta reserves the right to request additional custodians in a meet and confer to be scheduled promptly after the agencies’ disclosure of an initial proposed custodian set.

REPORT SUMMARY	
Documents in searchable set	592,727 NOTE: This number represents approximately 10% of the 3.7TBs collected material. Loading is ongoing.
Total documents with hits	432,961
Total documents with hits, including Family	518,359
Total documents without hits	74,368

Definitions	
Hits	The number of documents in the searchable set that contain the search term.
Documents with hits, including Family	Counts the documents with hits for each term as well as all documents in the same relational group as the documents with hits. Full families will be included in the review population and corresponding productions.
Unique hits	Counts the number of documents in the searchable set returned by only that particular term. Unique hits reflect the total number of documents returned by a particular term and only that particular term. Unique hits often indicate an overly broad term.
% Unique	Presents the percentage of total hits for each term are unique for easier term assessment.

REPORT SUMMARY	
Documents in searchable set	592,727 NOTE: This number represents approximately 10% of the 3.7TBs collected material. Loading is ongoing.
Total documents with hits	53,529
Total documents with hits, including Family	174,252
Total documents without hits	418,475

Definitions	
Hits	The number of documents in the searchable set that contain the search term.
Documents with hits, including Family	Counts the documents with hits for each term as well as all documents in the same relational group as the documents with hits. Full families will be included in the review population and corresponding productions.
Unique hits	Counts the number of documents in the searchable set returned by only that particular term. Unique hits reflect the total number of documents returned by a particular term and only that particular term. Unique hits often indicate an overly broad term.
% Unique	Presents the percentage of total hits for each term are unique for easier term assessment.
